

Application for DNA testing Relationship

How did you hear about DNALabs?

- Website (specify) _____
 DNALabs brochure (where did you get it from?) _____
 Doctor
 Lawyer
 Other (specify) _____

Step 1

Complete this application form and return to DNALabs. You can mail, email or fax the document to:

DNALabs
 Locked Bag 145
 North Ryde NSW 1670
 E: info@dnalabs.com.au
F: +61 2 9855 5446

Step 2

Once we receive the application, we will send a booking information pack to each person being tested. This allows each person to book their own DNA collection. The booking information pack includes an instruction letter and consent form (known as Form 2).

Step 3

Once you receive the booking information pack (allow 2 working days), each person being tested must book an appointment for their own DNA collection.

Step 4

On the day of the appointment, complete the consent form (Form 2) as instructed. Bring the completed form to your appointment together with an additional passport sized photo. The DNA collection is simply a painless swab of the cheek.

Step 5

The DNA sample will be sent to our laboratory for processing and your results will be sent to you from 10 working days. We recommend this report goes to your doctor or a legal professional to help you interpret the result. Please fill in the boxes below to indicate who should receive the report. Your understanding of this process is important to us, please call us on 1300 663 244 if you would like to discuss any part of your application.

DNA testing may result in unexpected outcomes with significant effect on persons tested. It may be useful to discuss the implications of the results for you and your family with a counsellor or legal professional before undergoing testing. Results will only be faxed to a doctor or solicitor. Results cannot be issued to a minor under the age of 18. All persons tested in a case can request a copy of the results by application (additional fees may apply).

**Please contact 1300 663 244 for pre-approval of these services. Prices are correct at time of publication (December 2016), however may be subject to change. P.O.A Price on application*

DNA testing relies on comparisons of the parties tested to the general population. For example, the test assumes that no one related to the testing father could also be the father. Please notify us if this is not the case for you. DNA relationship testing will yield an informative answer for the analysis of mother-child-father relationships. DNA relationship testing may not always be as informative for other relationship testing combinations. This will only be evident to the lab after testing.
